How to add pictures to the template?

Click on the gray box „placeholder” where you want to place the image. In the layers panel should automatically select the layer you signed placeholder. Choose File - Place and select your photo and place it in the template. Photo added as a smart object. Confirm this by pressing enter. Then select from the top menu Layer - Create Clipping Mask. Enjoy your photos in the template.

Photos are not included in the files. They are placed only a preview.
